

Global Markets Program
Professional Series

About Market Trader Academy

About Market Trader Academy Market Trader Academy is a New York based educational institute that is registered with and accredited by the International Accreditation Organization (IAO) and the American Association for Career and Technical Education (ACTE). Furthermore, Market Trader Academy is a member of the US Chamber of Commerce.

The Global Markets Program Professional Series is designed to educate participants on the world's largest and most active international financial markets. The program explores how these markets work and why they are so heavily traded.

The focus of the series is to train attendees to recognize and exploit advantages in the global markets by learning to invest and trade successfully in each market. In addition, attendees will learn how to use their market knowledge to mitigate the risks to conventional business that can arise from global economic developments.

The Professional Series provides participants with a higher level of analytical skills based on fundamental and technical analysis as well as practical trading and risk management strategies.

Accreditation & Registration

Course Content

The Course consists of the following workshops:

1. Investing in Precious Metals
2. Introduction to the Forex Market
3. Introduction to Technical Analysis
4. Introduction to Commodity Trading
5. Basics of Options Trading
6. Fundamentals of Stock Trading
7. GCC Stock Markets
8. Overview of Global Financial Markets
9. Fixed income (bonds) and money markets
10. Risk management and trading strategies

Precious Metals Markets

Gold Prices have risen by over 430% since the year 2000, when the price of a single ounce stood at US \$278.00. The rise of silver has been even more meteoric, increasing by more than 500% in the same period. What are the main factors contributing to such phenomenal appreciation? How high will gold and other precious metals rise? And how will the actions of central banks, who have recently become net buyer of gold for the first time in over 30 years, affect price?

The “Introduction to Precious Metals” workshop will provide a deep understanding of the precious metals market and discuss various ways to invest in it. We will explore the history of gold and silver and learn how these metals have come to play such a pivotal role in our lives. We will track the journey of gold through the past 100 years in order to understand how it has shaped our global economic and political landscape. Practical consideration will be given to the different types of gold investments available and the advantages and disadvantages of each. Special attention will be given to the buying trends of the world's major gold consuming markets, with an eye toward analyzing how these trends will influence the price of gold for years to come. We will also cover recent changes in the factors affecting the price of precious metals, such as the increasing use of silver in catalytic converters and the use of gold as an inflation hedge.

The object of the workshop is to deliver a comprehensive overview of the precious metals market and to provide students with the tools necessary to explore investment opportunities in this lucrative sector.

Introduction to the Forex (FX) Market

The foreign exchange market is the largest financial market in the world. According to the last tri-annual report issued by the Bank of International Settlement, daily trading volume in the FX market has reached a staggering \$5.3 trillion (USD).

This portion of the Professional Series features an in depth discussion of the foreign exchange market with an emphasis on the opportunities and risks present. Topics covered include:

- A History of the Foreign Exchange Market
- The Major Participants and Influencers of the Market
- Advantages of the Forex Market
- Types of Forex Brokers
- The Nuts and Bolts of Forex Trading.
- A Review of Factors that Affect the Global Currencies
- Characteristics of the Major Currencies
- Specific Strategies for Specific Currency Pairs
- Hedging Currency Volatility
- Managing Currency Reserves

Technical Analysis of Financial Markets

Chart reading and analysis have long been considered some of the most reliable methods for forecasting market trends. As such, mastery of these skills is of critical importance. This workshop explains what technical analysis is, how it works, and why so many traders use it. Topics covered include:

- The Logic Behind Technical Analysis
- Types of Charts
- Support and Resistance
- Trend lines and Channels
- Consolidation Formations
- Candlestick patterns
- Forecasting Trends
- Categories of Market Indicators
- A review of the Top 5 Indicators

The object is to teach participants how to read price charts and use technical analysis to uncover profitable trading opportunities in any market. With proper guidance, attendees will master the techniques used by the most successful technical analysts in the industry today.

Commodities Market

Much of what we use and consume on a daily basis is affected directly by what happens in the global commodities markets. The prices for everything from the fabrics our clothes are made of, to the staple foods we purchase, are set in these international markets. This workshop will cover the following important topics:

- A Brief History of Commodities Markets
- The Function of a Commodity Market
- Hedging vs. Speculating
- Exchange Based vs. Over-the-Counter Trading
- Fundamentals of the 4 Major Groups of Commodities (Agriculture, Energy, Metals, Financial Futures)
- Profiles of Renowned Commodity Traders

The legendary commodity trader, Jim Rogers once said, "to be a truly great investor is to know something about commodities." This workshop aims to accomplish exactly that - to give attendees a comprehensive understanding of how commodity trading works and provide the tools necessary to exploit the available investment opportunities.

Introduction to Options

Options are widely regarded as the tool of the sophisticated investor. They can be applied to all major financial markets and offer an excellent opportunity to maximize profits while safely capping losses. Knowing how to use options properly, opens the door to a variety of cutting edge trading strategies that can help you reach your trading and investment goals.

This workshop will cover:

- The Basics of Options Trading
- The Mechanics of Calls and Puts
- Locating and Interpreting Options Quote Tables
- Single and Multi-Legged Options Strategies
- Hedging with Options
- Profit Analysis Charts and Visualizing Real Risk
- Generating Short Term Income with the Short Call

The objective of this workshop is to teach participants how to incorporate these new tools into their current trading habits. Students will learn how options based strategies can be used to maximize profit or mitigate risk in the financial market of their choosing.

GCC and Global Stock Markets

Most countries around the world have a domestic stock exchange and many people are familiar with the term "stock market". However, despite widespread fascination, the vast majority of people have never traded international stocks. More often than not, individuals sit on the sidelines failing to capitalize on stock opportunities simply because they do not understand the market.

The "Fundamentals of Stock Trading" workshop is an excellent launching pad, both for individuals interested in entering the stock market for the first time, and those already trading stocks who seek to improve their understanding of the GCC and global market.

This session covers the following topics:

- What is a Stock Market? Who are the Main Participants?
- Classifications of Stocks
- Market Sectors
- Major Regions of the World
- Fundamental Analysis of Stocks
- Overview of Past Market Crashes
- Exchange Traded Funds (ETFs)

The object of this workshop is to provide attendees with a foundation in stock market mechanics that will prepare them to make sound investment decisions based on reasoned analysis of fundamental data for firms and market sectors.

Fixed income (bonds) and money markets

Governments, banks, and corporations access the bond and money markets either as creditors or debtors. This is the market that provides the financial fuel for much of the world's capital intensive activity to occur. It facilitates business operations for corporations looking to expand and makes building a bridge or a highway possible for governments.

This workshop will cover the following topics:

- Fundamentals of the Bond Markets
- Classification of Bonds
- Most Traded Government Bonds
- Interest Rate and Yield
- Credit Ratings and Why They Matter
- Islamic Sukuk
- Repo Operations
- Bond vs. Other Markets

Risk Management and Trading Strategies

Risk management is the single most important differentiating factor between sound investment strategy and careless gambling. In the absence of conscious money management policies, it is easy for a trader or investor to allow emotions to overtake logical reasoning.

Irrespective of what market one chooses to invest in, or which form of analysis one prefers, all actions in the global markets should be covered with a sound set of risk management policies.

This workshop will discuss the following topics:

- Understanding the Money Management Process
- Risk, Reward, and Total Ruin
- Portfolio Diversification
- Management of Open Positions
- Allocation of Capital and Controlling Market Exposure
- Deployment of Mechanical Systems
- Investment Strategies: Income vs. Appreciation

Live Simulated Trading of Global Markets

A fundamental tenet of the Market Trader Academy's educational approach is that practical experience must be a part of the learning process. A proper understanding of the global markets can only be attained when market theory is put into practice in a real trading environment.

To that end, Market Trader Academy has incorporated live trading practice in all of its courses.

The live simulated trading portion of the Global Markets Program is designed to allow participants to experience what it feels like to analyze and evaluate market conditions in real time, using the knowledge and skills gained through the course.

Participants will place trades in the market and manage those trades from open to close developing both technical and emotional nuance. Simulated trading is the best method to gain a deeper understanding of trading and investing in the global markets.

Meet Our Trainers

Brian Dolan,
Bestselling author of "Currency
Trading for Dummies"

Brian Dolan is the author of the bestselling book "Currency Trading for Dummies" and a career veteran of the foreign exchange market. Brian has over 20 years of experience as both a trader and a strategist at leading global banks including Dai-Ichi Kangyo, Credit Suisse, and Julius Baer.

Most recently, Brian was the Chief Currency Strategist at Gain Capital/FOREX.com from 2003-2012, where he was a frequent commentator on CNBC, Bloomberg TV and BNN (Canada), as well as a regular source for Reuters, Dow Jones/Wall Street Journal, MarketWatch, and numerous other financial media.

Brian is currently the Head of Global Markets Education at Market Trader Academy.

Hatim El Atabani,
CGMT
Managing Director, MTA

A 19 year veteran of the global markets, Hatim started his career as a forex sales trader and a technical analyst.

In the past few years, Hatim has worked as the managing director of a UAE based equities brokerage firm, where he was in charge of advising and block trade execution of trades belonging to global funds investing in the MENA region including Morgan Stanley and Deutsche Bank.

Prior to joining MTA in 2013, Hatim was active in the private equity division of his firm where he was involved in structuring multimillion dollar deals in farmland, hospitality, and mining in Africa and the Middle East. Hatim is a frequent guest on regional and international media outlets such as CNBC, Dubai TV, and Al Arabia TV.

Amro Zakaria,
CGMT
Managing Director,
TradeSys Advisors

Amro has over 14 years' experience in global markets starting his career trading agricultural commodities and later US equities in 2001. A year later he joined FXCM (NYSE: FXCM) where he worked for 7 years as vice president of institutional sales and regional director of the Middle East & Africa division. In 2008 he joined Global Forex and Futures (GFT), a US based brokerage firm, and worked to establish their presence in the Middle East and Africa. He later founded TradeSys Advisors, a fund management and market advisory firm with clients that include banks, family offices, and brokerage houses. Amro is a frequent guest speaker in industry conferences and events around the world as well as a frequent guest in many global and regional media outlets including CNBC, Dubai TV, Al Hurra, and Al Arabia TV.

Mr. Sunny Edisi,
CGMT
Regional Director Africa

Mr. Edisi hails from Nigeria and works out of the regional office in Dubai as well as oversees operations in the African continent. Having graduated from the prestigious Obafemi Awolowo University in Nigeria, Mr. Edisi brings a wealth of knowledge augmented by his educational background as an economist and 8 years of experience in the financial markets. He is an active trader and market researcher. Mr. Edisi is currently pursuing his CFA.

Guest Trainers

Mr. Boris Schlosberg

Bestselling author of "Millionaire Traders" and "Technical Analysis of the Currency Market"

Mr. Schlosberg brings over 20 years of financial markets experience to the Academy. In addition to being MTA's honorary Chief Trainer, Mr. Boris Schlossberg is Managing Director of FX Strategy for BK Asset Management and Co-Founder of BKForex.com. His career on Wall Street began over 2 decades ago with Drexel Burnham Lambert and during that time he has traded a variety of financial instruments, from equities and options to stock index futures and foreign exchange. In 2004, Boris joined FXCM and helped start the firm's FX Education initiative. In 2005, he joined the research team as Senior Currency Strategist and provided fundamental and technical analysis to the company's global network of individual and institutional customers, as well as numerous financial media outlets. Mr. Schlossberg is a weekly contributor to CNBC's Squawk Box and a regular commentator for CNBC Asia and CNBC Europe. Mr. Schlossberg has written for SFO magazine, Active Trader and Technical Analysis of Stocks and Commodities. He is the author of Technical Analysis of the Currency Market and Millionaire Traders: How Everyday People Beat Wall Street at its Own Game, both of which are published by Wiley.

Ali Hamoudi

Managing Director- Middle East at The Wilton Group

Mr. Hamoudi has over fifteen years of experience in the financial markets working for trading companies in the United Kingdom and the Middle East specializing in foreign exchange, international stocks and commodities trading. Between 2005 & 2007 as E*Trade's Europe, Middle East, and Africa Manager in London, UK., he helped carry E*Trade's regional expansion vision by building on an impressive client base and managing the launch of E*TRADE in the Dubai International Financial Center (DIFC). Mr. Hamoudi is a financial trading expert with extensive experience in developing and structuring comprehensive training programs with a focus on high net worth & ultra high net worth clients. Mr. Hamoudi has held several key roles in multiple trading enterprises in the United Kingdom and the Middle East. He is a frequent weekly guest on CNBC, Dubai TV, Al Jazeera and various other TV News Channels as well as a featured commentator on Dubai Eye radio 103.8 FM covering local and international financial markets.

Mr. Shaun Overton,
Trading Systems Expert

Shaun Overton is one of the most sought after trading strategy programmers in the world today. He started in the forex industry in 2005 working as a broker at FXCM (NYSE: FXCM). He led the sales effort for an automated trading fund, which led to his interest in automated trading. In 2007 he founded his own algorithmic programming firm after observing a strong customer demand for assistance programming their own trading ideas. Shaun programs in C# and MQL, but primarily acts as the company project manager. Shaun conducts the "Trading Strategy and Algo Development" course for MTA.

Bestselling Author

Ms. Kathy Lien

Bestselling author of "Day Trading the Currency Market" and "Day Trading and Swing Trading the Currency Market"

Ms. Lien was chief currency strategist at Daily FX and FX360. She is an internationally published author and forex professional with nearly a decade of experience using technical and fundamental analysis to trade spot forex and options. She has worked for JP Morgan Chase's cross markets and foreign exchange trading groups, and she is frequently quoted on CNBC, Bloomberg, Fox Business News and Reuters.

Market Trader Academy

Training Facilities

Market Trader Academy has state of the art training facilities in both its New York headquarters and Dubai office. Course attendees will find a perfect atmosphere for learning and practicing live trading with their mentors.

Financial Crisis Tour in New York

As part of the "Global Markets Program" Professional and Executive Series, participants will be taken on a tour of Wall Street and New York City's most renowned financial landmarks. The tour is designed to give participants an opportunity to visit a number of sites that few have ever or will ever see, that make New York the financial capital of the world. Garnering glowing recommendations from both the BBC and The New York Times, the tour includes the following highlights:

- Inside visit to the Federal Reserve Bank of New York
- Entering the gold vault at the Federal Reserve
- A Visit to the World Financial Center, Ground Zero
- A guided walk down Wall Street with a street veteran
- A walk by Goldman Sachs, Standard and Poor's, and the AIG buildings
- Time Square, NASDAQ, and the New York Stock Exchange buildings
- Visit to a brokerage firm trading floor to witness the trading action live
- Learn about the most significant event since the Great Depression
- Visit movie sets done on or about Wall Street

Certified Banker Division

About

CertifiedBanker.org is the banking education and training division of Market Trader Academy USA . MTA has teamed up with global industry leaders in banking and bankers' education to formulate cutting edge course content that provides a deep understanding of the banking industry direction and latest trends. Certified Banker offers over 400 courses designed to provide actionable ideas and practical skills that help today's bankers tackle new challenges and approach tasks with intelligence and innovation.

Institutional Training

The institutional Training Program is designed to help banks satisfy employee professional development and regulatory compliance training requirements. More than 1,500 banks, credit unions, and federal regulatory agencies leverage the banking learning & development courseware to effectively develop employees.

The courses provide training specific to the job functions and roles in every bank, including; Board of Directors, tellers, marketers, executives, HR and others. Courses are delivered via the CertifiedBanker Learning Management System, which simplifies training administration and reporting with automation while offering enhanced functionality for system and course customization and management of instructor-led training. In addition, bank employees enjoy an intuitive experience that helps them learn, retain, and apply training on the job. Institutions and managers can manage and conduct training by department, division, rank, and specialty. The institutional training program includes the following:

- All About Office 2007
- Customer Relationship Management
- Residential and Mortgage Lending
- Personal Banker Program
- Operations and Financial Skills
- Consumer Credit Lending
- Sales & Teller Program
- Manager & Directors Program
- Human Resources Program
- Business Management & Communications
- Compliance Program

Professional Banker Development Courses

This is a membership program for individual professionals who are looking to pick and choose from the list of over 400 courses for their own professional and career development.

Each membership level provides the trainee with access to a number of courses. A certificate of completion will be issued upon the completion of each course. For more information on the packages or for a list of the 400 courses, please visit www.certifiedbanker.org
